## 2 CAMERA PACKAGES

Why have two camera's, well the more you can capture on the day the more we show on screen and the greater the choice of shots. The ceremony, speeches and photo calls will have multi angle and cut aways, this adds great dynamics to your wedding DVD.

One camera stays with couple and the second can gain all the detail and reactions you would never get to see or remember from your day, and detail is everything.

Live sound is always used within your DVD and music of your choice is used within the production. We always arrange a full production meeting with every couple to gain the fine timings and detail of your wedding day.

The Wedding DVD package starts with a main package bundle and then the control is yours to add any of the unique Top-ups to your bundle, from The bride at Home to wedding guests messages. Every wedding is different and so is every wedding DVD.

We also have a ready made 2 camera packages for you and also saves you money, now that's got to be a deal.
